- Trained and created multiple backups for Quality Assurance process.
- Got appreciation for helping other teams during high volumes.

RESEARCH PROJECT

Analyzing user personality using Social media profiles, 01/2020
Description:
Designed and implemented a web application which successfully retrieves user's tweeter threads from the given Tweeter handle and performs text classification on the tweets using machine learning and categorizes the users into different personality type based on the Myers's Briggs Personality Assessment. The model achieved 75 percent accuracy; the application provides results similar to the results obtain from written personality assessments questionnaires.
